

# ELECTRICAL

## PANEL & CABINET BUILD

Panel and cabinet assemblies typically consist of multiple components including terminal rails, switches, contactors, circuit breakers all housed in cabinets or on panels.

BTRoS Interiors & Cabling Division can manufacture bespoke or customer specified solutions. Built by our highly trained and skilled operators we offer full turnkey solutions from procurement of raw materials through to fully tested completed goods, including on-site installation and commissioning if required.

## WIRING HARNESSSES

BTRoS Interiors & Cabling Division possess a wealth of experience in complex loom and harness manufacture.

Providing intricate wiring solutions for applications in markets such as rail, aerospace, military and simulators has given BTRoS Interiors & Cabling Division significant expertise. We cover a vast range of electrical components including circular, power, military, RFI shielded, RF coax, sealed connectors and open wire connections.

All our products are manufactured in-house including all fabrication requirements. They are fully tested using advanced technical equipments. Tests are carried out to customer requirements and include continuity, resistance, functionality and high voltage flash testing.

## KEY FEATURES

Full Turnkey Solutions  
Integrated Systems  
Installation & Commissioning  
Full ATE on all Assemblies  
Quality Control  
Technical Support
