

# FABRICATION

## SHEETMETAL

Our sheetmetal manufacturing facility combines state of the art machines with our highly skilled sheetmetal workers and welders producing precision made products built to a high quality standard.

We provide a comprehensive range of processes enabling us to be a single source supplier ensuring that the highest quality finish and controls are in place at all times.

Continued re-investment in the latest machinery allows us to improve production efficiencies, offer competitive costing and maintain/improve high quality standards.

We have our own in-house engraving and silk screen printing facility and can also offer additional processes including:

- Powder Coating
- Zinc Plating
- Anodizing
- GRP Mouldings
