

MANUFACTURING

MANUFACTURING FACILITY

We have 8000m² of production space with potential to increase if required.

Our production workforce of 300+ highly skilled and experienced operators are fully trained, including:

- Coded MIG and TIG Welders
- Sheetmetal Workers
- Mechanical Assemblers
- Electrical Assemblers
- Electrical Testers
- Inspectors

Our production is planned and scheduled to meet customer delivery requirements using our Enterprise Resource Planning (ERP) system.

All customers are project managed supported by our production engineering teams which include engineering change control, methods and continuous improvement to ensure high level of quality standards are maintained to meet customer satisfaction.

Using lean manufacturing methods all Projects are carefully assessed for tooling, layout and HSE requirements to ensure production efficiency is optimised.

All our tooling calibration is carried out in-house to BS4579 (part 1) or customer specified.
